Product Description

SS Seamless Tube ASTM A270 A554 SS304 316L 316 310S 440 1.4301 321 904L 201

Stainless steel pipes need to be annealed before hot rolling, but cold rolling does not. Hot rolling is a stainless steel seamless pipe produced by annealing the tube blank and then expanding the holes on a broaching machine and reducing the wall. It has better pressure resistance and flexibility, and the process performance of the product is better than ordinary cold-rolled pipes.
